

# Chinese FeCr prices dip after mills' January tender cuts; Japan, South Korea stable

### SHANGHAI, SINGAPORE

China's domestic spot ferro-chrome market softened in the week ended Friday December 28 after the country's leading stainless steel mills lowered their January tender prices.

China's major stainless steel mills – Tsingshan Group, Taiyuan Iron & Steel (Tisco) and Baosteel – cut their January tender prices for high-carbon ferro-chrome by 50 yuan (\$7) per tonne last week.

Fastmarkets' January price assessment, calculated on December 28, for Chinese domestic ferro-chrome on long-term contracts was 6,650-6,900 yuan per tonne based on tender prices. This was down 0.7% from 6,700-6,950 yuan per tonne for December.

Chinese ferro-alloy smelters have not complained much following the latest round of tender price cuts, not only because it is in line with their expectations but also because they can still make profits due to a decline in prices of other raw materials, market participants told Fastmarkets.

"Coke prices were heard to have dropped by around 200 yuan per tonne recently. In terms of the fact that the production of one tonne of ferro-chrome consumes around half of a tonne of coke, even with this 50-yuan-per-tonne cut [in ferro-chrome tender prices], the situation for ferro-alloy smelters did not worsen. Instead, they can still make 100-200 yuan per tonne in profits," a market source said.

China's spot ferro-chrome suppliers responded swiftly by shaving their offer prices by around 100 yuan per tonne as part of efforts to entice buyers and generate cash before the end of the year, sources said.

Fastmarkets' price assessment for Chinese spot domestic ferro-chrome was at 6,700-6,900 yuan per tonne on December 28, down 1.4% from 6,800-7,000 yuan per tonne the week prior.

Meanwhile, China's import ferro-chrome market remained quiet last week with no deals reported.

Fastmarkets' charge chrome index, cif China, stood at 81 cents per lb on December 28, maintaining a level held since November 16 due to a lack of liquidity.

"I have not heard any trading on charge chrome [in the past week] but I believe [Chinese] mills would likely not be willing to accept a price higher than the equivalent of their tender prices," a market participant said.

The upstream chrome ore market eased slightly amid thin trading activity because many foreign suppliers were still absent from the market due to year-end holidays.

Fastmarkets' UG2 chrome ore index, cif China, stood at \$155 per tonne on December 28, down 0.6% from \$156 per tonne previously, following reports of business being concluded at lower levels last week.

"We bought some [chrome ore] at \$155 per tonne and this will be our last procurement of seaborne cargoes before Chinese New Year [February 4-10, 2019]," a Chinese buyer said, adding that they have almost completed restocking material for use during that holiday period.

The spot chrome ore market, however, was relatively active with buyers securing cargoes for use either over the New Year holiday

(December 31, 2018-January 1, 2019) or during the week-long Chinese New Year holiday, according to market participants.

UG2 chrome ore trades were heard at 30.50-31 yuan per dry metric tonne unit at major Chinese ports, unchanged from the prior week, while ore inventories fell to about 2.87 million tonnes from 2.88 million tonnes over the same comparison.

#### **SOUTH KOREAN, JAPANESE FECR MARKETS FLAT AMID QUIET SPOT TRADING**

Ferro-chrome prices in North Asia, excluding China, were stable this week amid inactive spot trading.

Fastmarkets' price assessment for high-carbon ferro-chrome, cif Japan, was unchanged week on week at \$0.81-0.85 per lb on December 27.

Most Japanese market participants were absent from the market ahead of the New Year holiday.

"The market should be stable as a result of the absence of spot trades since we are now approaching the New Year holiday," a trader said.

Producers were also busy with long-term contract negotiations, so were not active in the spot market.

"Japan has virtually no spot demand right now," a producer said, adding that the market is more on long-term contract negotiations.

But market sources told Fastmarkets that negotiations for supply of ferro-chrome to Japan in the first quarter of 2019 might not be based on the European benchmark, but rather on Chinese ferro-chrome prices.

"Deals are not going to take place using the benchmark for the [first quarter]. Instead, clients want to use a floating price tracking Baosteel's tender price," the producer said.

According to producers, Japan's ferro-chrome contract prices used to be primarily based off the European benchmark, with a

23-24% discount applied to it.

"Since Chinese ferro-chrome prices started declining, clients have been asking to track Chinese ferro-chrome tender prices," the producer added.

Elsewhere, Fastmarkets' price quotation for high-carbon ferro-chrome, cif South Korea, was also unchanged this past week, holding at \$0.78-0.80 per lb on December 27.

Traders said \$0.80 per lb remained a workable price for the market at the moment, but noted that demand had fallen significantly due to the weaker stainless steel prices.

"Demand has been very weak here and spot trades are very limited now," a trader said.

Meanwhile, a major buyer in Korea was heard to be negotiating its long-term contract prices quite aggressively. Bids were at \$0.77-0.78 per lb and deals were likely to be concluded at \$0.78 per lb, market sources said.

"Based on our negotiations, clients want the contract prices to track Chinese steel mills' tender prices because of the relatively low prices there now," a second producer said.

Buyers were also heard to be inquiring into the spot market for lower prices instead of buying via long-term contracts based on the European benchmark.

### 2018 REVIEW: Sanction, tariff volatility stifle fickle base metals complex; zinc down 26%; tin's fourth-quarter freeze

While base metals prices began the first quarter of 2018 following the uptrend from the previous year, the advent of sanctions, global trade tensions and tariffs – notably Section 232 – swiftly became a focal point in what became a year of volatile price action.

In addition, a broad trend of depleting LME stocks further exacerbated choppy price action, while strength in the US dollar index above the psychological level of 97 proved detrimental to commodity investment.

"From the middle of this year, the escalating trade conflict between the US and China caused distortions on the metals markets time and again," Commerzbank's research note said.

"This is because each new level of escalation made market participants more and more concerned that the trade dispute would have a detrimental impact on the real economy. The reaction in metal prices was correspondingly negative, with prices slumping in the second half of the year after having enjoyed a positive first half year," it added.

Beginning the year firmly above \$7,000 per tonne, copper's three-month price shed more than 21% over the summer, dropping from a five-year high of \$7,348 per tonne in June to a one-year low of \$5,773 per tonne on August 15.

By October, the metal's total on-warrant stock count fell to its lowest in more than a decade at 56,650 tonnes on October 31, yet its price action remained below \$6,000 per tonne, with macroeconomic tensions proving as the most dominant price drivers.

Yet while copper ended the year just over 17% lower, the three-month zinc price closed the year 26% lower. Beginning the year firmly above \$3,300 per tonne, zinc futures fell more than 36% from a 2018 high of \$3,595.50 per tonne on February 15, to a 2018 low of \$2,283 per tonne on August 15.

Equally, a decade low in total LME stocks at 110,700 tonnes on December 5 prompted the metal's widest backwardation in the cash/three-month spread since 2007 at \$124 per tonne.

Not far behind, lead's three-month price ended over 20% lower on the year, beginning 2018 at \$2,558 per tonne and ending the year at \$2,021 per tonne. The metal fell more than 28% from its 2018 high of \$2,653 per tonne on January 25, to a 2018 low of \$1,905 per tonne on November 6.

## SANCTIONS UNSETTLE ALUMINIUM MARKET

The US Department of the Treasury's Office of Foreign Assets Control (OFAC) decision on April 6 to sanction Russian oligarch Oleg Deripaska and Russia's top aluminium producer, UC Rusal, rattled the aluminium market.

Despite starting the year strong at \$2,265 per tonne, the metal's three-month price soared to a six-year high of \$2,718 per tonne on April 19.

Participants in the aluminium market swiftly liquidated Russian material, prompting the largest volumes traded on the exchange throughout the year at 42,936 lots.

Yet, this month's announcement that OFAC plans to remove sanctions resulted in a 29% drop in the metal's three-month price, with aluminium futures reaching a fresh 2018 low of \$1,830 per tonne on December 31 – its lowest level since July 2017.

Meanwhile, speculation surrounding potential sanctions against Russian nickel producers prompted a similar climb in the metal's underlying price, which began the year at \$12,655 per tonne and ended 15.4% lower at \$10,695 per tonne.

On April 19, nickel's three-month price reached a 2018 high of \$16,690 per tonne, its highest level since December 2014. Since then, the metal's price action has trended down, falling to its lowest level since October 2017 at \$10,630 per tonne on December 31.

## TIN AGAINST THE ROPES

Beginning the year at \$19,835 per tonne, tin's three-month price entered 2018 as the worst performing base metal, down 5.2% from its January 2017 high of \$21,200 per tonne, while LME on-warrant material sat below 2,000 tonnes.

By the end of January 2018, the metal's three-month price had spiked 10% to reach a 2018 high of \$22,000 per tonne, its highest level since November 2016, while changing rules regarding the granting of export licences from Indonesia – tin's second largest global exporter – would keep the metal's three-month price elevated throughout the first half of the year.

Over the summer months, tin's price action would soften by more than 15%, with the metal's futures price falling below \$19,000 per tonne amid on-warrant material climbing to just below 3,000 tonnes.

In mid-October however, the Indonesian Commodities & Derivatives Exchange (ICDX) ordered a halt to all exports amid a

government suspension of PT Surveyor Indonesia, one of the countries key smelter inspectors.

While prices remained low in the wake of the suspension, and even registered a fresh 2018 low of \$18,145 per tonne on November 27, tin's three-month price rallied throughout December, climbing 7% and ending 2018 as the best performing base metal, down just 1.9% on the year.

## PRICING NOTICE: Pricing schedule clarification for Fastmarkets' Rotterdam duty-paid aluminium premium

Fastmarkets would like to clarify that its Rotterdam duty-paid P1020 aluminium premium assessment for Tuesday January 1 was published on Monday December 31, 2018 instead.

This is in accordance with the premium's published pricing schedule and the holiday calendar of the London Metal Exchange.

The premium published on December 31, 2018 has been included in Fastmarkets' monthly average for December 2018 and not January 2019.

Fastmarkets MB assessed the Rotterdam duty-paid aluminium premium at \$110-120 per tonne in-warehouse on December 31, 2018, a level unchanged since December 18, 2018.

This premium is assessed twice weekly on Tuesdays and Fridays.

All Fastmarkets' base metals prices follow the London Metal Exchange's holiday calendar, which is based on the England and

Wales holiday calendar. Prices that fall on LME closing days are published on the closest day prior or after that day.

To provide feedback on this premium or if you would like to provide price information by becoming a data submitter to this premium, please contact Perrine Faye by email to: [pricing@fastmarkets.com](mailto:pricing@fastmarkets.com). Please add the subject heading FAO: Perrine Faye re: Rotterdam duty-paid aluminium premium

## SINGAPORE

### Manganese ore prices rangebound on fewer trades; Chinese market bearish on downstream demand

China's manganese market was little moved in the last week of December with many market participants away for the Christmas and New Year holidays.

Fastmarkets' 37% manganese ore index, fob Port Elizabeth, inched up by 6 cents to \$5.62 per dry metric tonne unit (dmtu) on December 28.

Fastmarkets' 37% Mn manganese ore index, cif Tianjin, rose by 4 cents to \$6.29 per dmtu, while the 44% manganese ore index, cif Tianjin, was unchanged at \$6.89 per dmtu on Friday.

Seaborne trades were still heard at producers' offer levels although the number of trades fell.

Volumes bought were also smaller because of the upcoming Chinese New Year holiday (February 4-10), meaning most of the Chinese market will be away for the first two weeks of February and will consume less of the material.

"We are not planning to purchase any carbonate manganese ore after the New Year holiday unless producers continue to lower their offers," a domestic trader said. "After all, the domestic prices are dropping quickly."

Market participants were also bearish on near-term manganese

prices and several told Fastmarkets they are taking a wait-and-see stance on expectations ore prices will fall further.

"We don't dare to buy more manganese ore now because if demand continues to weaken, the prices will continue on a downward trend," a ferro-alloy producer said.

The slowdown in seaborne trades also spilled over to the Chinese ports of Tianjin and Qinzhou, where traders had to lower offers to secure business.

Manganese ore inventories at Chinese ports have been gradually rising throughout December due to weakening demand, with the latest assessed volumes at 2.8-3.03 million tonnes at the main Chinese ports of Tianjin and Qinzhou as of December 26.

"Most market participants are away now because of the year-end holidays but trading should pick up slightly in January for the downstream guys, especially if prices are lowered," another domestic trader said.

Domestic trades for manganese ore stayed at current prices due to inactivity in the last week of the year.

Quotations for 37% manganese ore were at 51 yuan per dmtu (\$6.20 per dmtu including VAT and port handling fees).

For manganese ore with 44% concentration, tradable prices for material of Australian origin held at 60 yuan (\$7.40) per dmtu while for Gabonese origin, tradable prices were unmoved at 58 yuan per dmtu (\$7.19) per dmtu.

## CHINESE FERRO-ALLOY PRODUCERS BEARISH ON MARKET

Downstream, prices of ferro-alloys such as silico-manganese and ferro-manganese declined week on week at the end of December.

"The steadily growing supply from ferro-alloy smelters is starting to pressure prices down, we want to see how far it can fall," a ferro-alloy producer said.

Fastmarkets' price quotation for spot domestic Chinese silico-manganese tumbled by 100 yuan to 7,600-7,900 yuan per tonne on December 28.

In the futures market, the most-traded May silico-manganese contract on the Zhengzhou Commodities Exchange dropped 96 yuan per tonne to 7,234 yuan per tonne at the close on December 28. Silico-manganese market participants often view the futures price as an indicator of physicals price sentiment.

Meanwhile, Fastmarkets assessed the Chinese domestic ferro-manganese price at 7,000-7,100 yuan per tonne on December 28, a 100 yuan drop on the high end of the range.

"We are still waiting for steel mills to issue their tenders," a ferro-manganese producer said. "It's late this time round because there is not much demand now."

## SINGAPORE

### Chinese spot ferro-silicon prices slide on weakening demand

Chinese spot ferro-silicon prices declined in the week ended Friday December 28 amid persistently weak demand from steel mills, which are reducing their procurement rates due to falling rebar prices.

Fastmarkets MB assessed the price of Chinese ferro-silicon, 75% Si, at 6,800-7,000 yuan (\$989-1,018) per tonne on December 28, down 200 yuan per tonne from a week earlier.

Activity in China's domestic ferro-silicon market remained sluggish for a second consecutive week due to waning demand, market participants said, adding that they had a bearish outlook for the market over the short term because of the continued weakness in the downstream steel industry.

continued >

# Ores & alloys

Rebar prices in China have trended downward in recent weeks; Fastmarkets MB assessed rebar prices in eastern and northern China at 3,760-3,800 yuan per tonne and 3,630-3,670 yuan per tonne respectively on December 28. This is down from assessed prices of 4,650-4,690 yuan per tonne and 4,410-4,520 yuan per tonne in eastern and northern China respectively at the beginning of November.

These lower rebar prices have squeezed steel mills' profit margins, causing some to reduce their procurement rates, while ferro-silicon production has largely been stable – all of which has contributed to a weakness in China's domestic ferro-silicon market.

"Domestic [ferro-silicon] prices are beginning to decline and this will continue for the next few weeks because of the weak steel rebar prices," a producer said.

There was also talk among participants that steel mills were considering halving their usual ferro-silicon tender volumes of 5,000 tonnes because of weak demand and a reluctance to hold onto material ahead of Chinese New Year (February 4-10).

Weakness in Chinese ferro-silicon futures prices were another cause for concern among market participants; the nearby January ferro-silicon contract on the Zhengzhou Commodity Exchange (ZCE) closed at 5,932 yuan per tonne on December 28, down from a close of 5,975 yuan per tonne on December 21. On December 14, the January contract closed at 6,117 yuan per tonne.

Yet an even lower closing price for the ZCE's most-traded May contract is indicative of just how bearish participants have become toward ferro-silicon. The most-traded May ferro-silicon contract closed at 5,730 yuan per tonne on December 28.

In addition, Chinese spot prices for magnesium, for which ferro-silicon basis 75% Si is a key raw material, declined for the fourth week in a row last week amid consumers' reluctance to stockpile the material due to expectations that the price weakness will continue.

Fastmarkets MB's price quotation for Chinese ex-works magnesium was 16,700-17,000 yuan per tonne on December 28, down from 17,300-17,400 yuan per tonne a week prior.

As for the export market, Fastmarkets MB assessed the Chinese ferro-silicon export price at \$1,260-1,280 per tonne on December 28, down from \$1,260-1,290 per tonne a week earlier.

Offers remained at \$1,270-1,280 per tonne last week.

Export demand for Chinese material was heard to be lackluster due to lower offers from other countries such as Russia.

"Russian ferro-silicon material prices is a lot lower than Chinese prices but we can't go so low due to our export tax and costs," the producer said.

"It won't make sense for us to lower our prices by so much," he added.

## KEY DRIVERS

- The market was extremely quiet during the Christmas and New Year break, with liquidity expected to return over the following seven days.
- No trades were reported for either the ferro-titanium or titanium scrap markets since the markets were last assessed.
- Both markets were expected to be stable in the short term, with an easing in bearish influences and the market in a state of balance. Yet, the uncertainty surrounding Brexit and the economic changes in the markets in Asia may delay long-term decision making.

## KEY QUOTES

- "I am not expecting any ridiculous swings higher or lower but I think the market will behave itself. However, I expect this to continue in the short term because people don't know what to do about Brexit. It will be pretty stable but it could all depend on the Asian economies" - one trader
- "The market has found a sweet spot so barring some sort of dramatic event, I think the market is happy where it is" - one producer
- "I think the period of lower sales prices from Russia is over so they may even try to push the market up" - second trader

### PRICING NOTICE: Amendment of Fastmarkets MB cobalt prices

Fastmarkets has changed the names of its benchmark in-warehouse Rotterdam cobalt price assessments on January 2, 2019.

The name 'standard-grade' has replaced the name 'low-grade'. The name 'alloy-grade' has replaced the name 'high-grade'.

These changes follow a market consultation on Fastmarkets MB's international cobalt price specifications completed in April 2018.

All historical data relating to both cobalt price assessments remains available in the pricing section of the Fastmarkets MB website. Fastmarkets reviews the specifications, including the potential to include any new brands, for its cobalt price assessments on an ongoing basis.

- Standard-grade cobalt, \$ per lb, in-warehouse
- Alloy-grade cobalt, \$ per lb, in-warehouse

As a result of these changes, the names of the following prices have also changed as of January 2.

- Cobalt sulfate, ex-works China, adjustment to standard-grade cobalt low-end price at Co 20.5% basis, \$ per lb
- Standard-grade cobalt, weighted average of all confirmed international trades, \$ per lb, in-warehouse
- Alloy-grade cobalt, weighted average of all confirmed international trades, \$ per lb, in warehouse

In addition, Tocantins broken cathodes and Norilsk ingots (K1A and K1AY) are no longer considered as part of the standard-grade

continued >

# Minor & precious metals

(formerly low-grade) assessment. As a result of this change, the minimum cobalt content for the standard quote changed to 99.8% from 99.3% previously.

Fastmarkets MB completed an external assurance review of some of its benchmark prices, including cobalt, carried out by independent professional services company PricewaterhouseCoopers (PwC), in September 2018.

To provide feedback on these changes or if you would like to provide price information by becoming a data submitter to these two cobalt price assessments, please contact Charlotte Radford by email at: [pricing@fastmarkets.com](mailto:pricing@fastmarkets.com). ## LONDON

### Erus Metals USA withdraws from LME warehouse services

Erus Metals USA LLC has withdrawn from London Metal Exchange warehouse services, the exchange said on Tuesday January 1.

Erus Metals USA is a subsidiary of Erus Metals Limited, the USA branch only had one warehouse left, in Panama City, Florida, which will now be delisted from the LME. According to exchange data in November, it held no LME stock.

In April 2014, the Gerald Group brought the LME-registered warehousing operations of Erus Metals from Reuben Brothers Resources Group (RBRG) as part of a deal to buy its bulk iron ore and steel trading activities formerly known as Metalloyd.

Outside the US, Erus Metals still has three LME-listed warehouses in Antwerp, Belgium, and one in the UK at Hull in north-east England. On November 30, 2018, Erus Metals transferred its warehouses in Kaohsiung, Taiwan, to new operator Henry Bath.

According to November 2018 data, there were only 312 tonnes left in Erus Metals warehouses - all in Antwerp - down from more than 20,000 tonnes in November 2017.

Last year, the LME's warehousing network continued to decline in both Europe and Asia, with stocks at near-decade lows. As of January 1, 2019, just 1,850,240 tonnes of metal are stored in LME-listed warehouses.

Metro International withdrew from warehouse services in Europe in December, while earlier in the year Worldwide Warehouse Solutions (WWS) went bankrupt and Katoen Natie closed its LME operations in Asia.

### SHFE vs LME physical arbitrage 02/01: Copper, aluminium, zinc, nickel

Arbitrage for copper, aluminium, zinc and nickel imported into China on Wednesday January 2\*

#### COPPER

-\$63.46 (-435.93 yuan)

#### ALUMINIUM

-\$365.78 (-2,512.79 yuan)

#### ZINC

\$57.9 (397.76 yuan)

#### NICKEL

\$29.41 (202.04 yuan)

\*Fastmarkets calculates the physical arbitrage for import into China daily by using SHFE front-month and LME three-month prices at 3pm Shanghai time, taking account of VAT and import duties (where applicable), physical premiums and exchange rates at the time of the comparison.

On January 2, 2018, Fastmarkets improved its calculation to more

accurately reflect arbitrage windows for physical trading. In addition, Fastmarkets has adopted China's latest announced VAT of 16% to its arbitrage calculation, effective May 2, 2018.

Also, on August 28, 2018, Fastmarkets amended its arbitrage calculation and will use the midpoint of the copper, aluminium, zinc and nickel premiums rather than the single number for its LME-SHFE arbitrage calculation.

### SHANGHAI, LONDON

## Copper scrap shipments to China to surge in H1 2019 ahead of new import restriction - BMO

There will be a massive influx of copper scrap to China in the first half of this year, with market participants hurrying to secure material before the country steps up its clampdown on scrap imports in the latter half, a BMO Capital Markets analyst said.

China will restrict the importing of copper scrap classified under HS code 7404000090, including category 6 copper scrap which does not require dismantling, with effect from July 1, 2019, the Ministry of Ecology and Environment said in late December.

Category 6 copper scrap is ready for industrial use and includes No1 and No2 copper scrap with copper content of up to 96%, such as birch and cliff.

Category 6 copper scrap comprises around 85% of total Chinese copper scrap imports, BMO commodities researcher Colin Hamilton

said in a note on Wednesday January 2.

Category 6 scrap will shift to the restricted from the unrestricted category of solid waste products imported for use as a raw material, although the details of restrictions are yet to be announced.

"These materials will... be subject to import restrictions, likely to involve a combination of quotas and outright bans," Hamilton said.

"H1 2019 will see a surge in import volumes ahead of the July deadline, at which point volumes will drop markedly," he added.

Fastmarkets assessed the discount for No 2 copper scrap on a cif China basis at 26-34 cents per lb at the end of December 2018, versus 28-36 cents per lb a month earlier. The discount has narrowed mainly due to lower seasonal availability during the end-of-year holiday.

The announcement of a restriction on imports of category 6 copper scrap, which requires no dismantling and is seen as more environmental friendly than category 7 scrap, was a shock to the recycling industry.

In 2018, the global scrap industry was already shaken by the massive diversion of low-quality copper scrap to ex-Chinese markets following a sharp cut in import quotas.

"History repeats - look at what happened to cat 7 copper scrap last year and you can tell what's going to happen to category 6 scrap," a copper scrap trader said.

Imports of category 7 copper scrap into China were completely banned this January.

China imported 2.24 million tonnes of copper scrap in January-November 2018, almost 40% lower than the 2017 full year import volume of 3.56 million tonnes, customs data showed.

# Discover How Steelmakers Can Meet Demand for Taller Wind Towers With Niobium

During the past 15 years, wind turbine towers have increased in height from 80 meters (262.5 feet) to 100 meters (328 feet) or higher to harvest the more dependable and consistent wind resources at higher altitudes. Unlike traditional steels unable to scale to the new taller standard, niobium-containing steel offers a solution.

Discover in this white paper from CBMM North America, Inc. ...

- How low carbon structural steel containing niobium can maintain steel's advantage over alternative wind tower materials for taller installations.
- How MicroNiobium gear steels are improving turbine gearbox reliability and design life.

### Chinese CRC, HDG export prices flat in quiet market

Export prices for Chinese cold-rolled coil and hot-dipped galvanized coil were unchanged over the past week amid illiquid spot trading and a lack of fresh offers from mills.

#### COLD-ROLLED COIL

Fastmarkets MB's weekly export price assessment for Chinese SPCC 1.0mm CRC was \$525-535 per tonne fob China on Wednesday January 2, the same as a week earlier.

No deals were reported during the past week. Market participants estimated that the tradable price remained within \$525-535 per tonne fob.

No new firm offers were heard from steelmakers either.

"It's too early for mills to release new [asking] prices because the new year just started," a Beijing-based trader said on Wednesday. Major mills in China typically issue new export offers every Tuesday.

Major Liaoning-based steelmaker Benxi Iron & Steel did not update its export offers for both CRC and HDG for this week, as of Wednesday afternoon. The mill's latest asking price for CRC was \$540 per tonne fob on December 25.

A trader source in Hong Kong said on Wednesday that Benxi Steel was likely to keep its flat steel offers unchanged this week.

Fastmarkets MB's weekly domestic assessment for CRC in eastern China was 4,150-4,200 yuan (\$604-611) per tonne ex-warehouse on December 28, down by 40-70 yuan per tonne week on week.

#### HOT-DIPPED GALVANIZED COIL

The Chinese HDG export segment was also quiet over the past week amid the year-end holiday lull, with no transactions or new offers reported.

Market participants said the tradable price range was still at \$545-550 per tonne fob.

Hebei-based Tangshan Iron & Steel was asking for around \$545 per tonne fob Tianjin on Wednesday, down \$10 per tonne from the previous week.

Benxi Steel's latest asking price was reported on December 25, at \$570 per tonne fob for zero-spangle, 140g zinc-coated HDG, which is equivalent to \$555 per tonne fob for the assessed 120g zinc-coated product.

Fastmarkets MB's weekly export price assessment for Chinese 1.0mm 120g zinc-coated HDG was \$545-550 per tonne fob China on Wednesday, unchanged week on week.

Last week, the majority of Chinese steelmakers were said to be insisting on higher deal prices for CRC and HDG because they were not in a rush to sell March-shipment material, having sold out their February-shipment cargoes.

Fastmarkets MB's weekly domestic assessment for HDG in eastern China was 4,220-4,280 yuan per tonne ex-warehouse on December 28, down 10-30 yuan per tonne from a week earlier.

## BURSA

### GULF FLAT STEEL IMPORTS: High stock levels keep demand low, prices down

Some flat steel import prices in Saudi Arabia and the United Arab Emirates have gone down over the past week on lower offers, sources said on Wednesday January 2.

Demand was subdued because stock levels in the UAE were already high and the market wanted to see how the steel market would move early in 2019, sources told Fastmarkets.

## UAE

Chinese offers of hot-rolled coil (HRC) into the UAE were priced around \$520-525 per tonne cfr, but no major deals were heard.

One buyer was bidding \$490-500 per tonne cfr.

Fastmarkets assessed the price of HRC imports into the UAE at \$500-520 per tonne cfr on Wednesday, falling from \$520-525 per tonne cfr a week before.

Chinese producers continued to offer cold-rolled coil (CRC) to the UAE at \$590-600 per tonne cfr, keeping Fastmarkets' weekly price assessment for such material imported into the UAE unchanged week on week at \$590-600 per tonne cfr.

Offers of 1mm hot-dipped galvanized coil (HDG) from Chinese suppliers remained at \$640-650 per tonne cfr in the latest pricing session, although there were offers from India at \$750-770 per tonne cfr.

Fastmarkets' weekly price assessment for HDG imports into the UAE was unchanged at \$640-750 per tonne cfr on Wednesday.

## SAUDI ARABIA

Market participants in China offered HRC to Saudi Arabia at \$520-530 per tonne cfr.

One buyer was bidding \$510-515 per tonne cfr for Chinese HRC.

Fastmarkets' weekly price assessment for Saudi Arabian HRC imports was \$515-520 per tonne cfr on January 2, falling from \$520-525 per tonne cfr on December 27.

## SERIFE DURMUS

## SHANGHAI

### CHINA HRC: Prices drop on slowdown in manufacturing sector

China's hot-rolled coil prices fell on Wednesday January 2, the first working day of the year, following the release of statistics pointing to a contraction in manufacturing activity last month.

## DOMESTIC

- Eastern China (Shanghai): 3,650-3,660 yuan (\$531-532) per tonne, down 30-40 yuan per tonne
- Northern China (Tianjin): 3,560-3,570 yuan per tonne, down 70-80 yuan per tonne

Trading was thin in the entire Chinese market during the day after sentiment was dampened by the release of the latest manufacturing purchasing managers' index (PMI) by the National Bureau of Statistics. China's manufacturing PMI for last month 49.4 points, down 0.6 points from November's 50 points.

This is the first contraction for the sector since July 2016, and the

lowest reading since February 2016. A reading of above 50 indicates expansion, while one that is below reflects contraction.

The price drop was also attributed to lower demand in the winter, with construction activity slowing down amid the cold weather, a source at a mill in northern China said.

## EXPORT

- MB fob China HRC Index: \$480.94 per tonne fob, down \$1.77 per tonne

The source told Fastmarkets MB that the mill he works for had exported some HRC recently around \$480 per tonne fob, though he did not provide any further details.

A few traders said the deals likely consisted of small quantities since most buyers would have been on holiday last week for Christmas. They added that the cargos were likely to have been sold to either Vietnam or South Korea, since buyers in those countries had been putting forward indicative prices recently.

Mills are still said to be selling their products to domestic traders at a minimum of \$485-490 per tonne fob. Few orders were heard during the day with buyers awaiting new offers from mills, though the latter have yet to be issued after the New Year holiday.

Before the break, several traders had received indicative prices of \$470-475 per tonne fob from Asian buyers.

## MARKET CHATTER

"I'm afraid export trading activity will be sparse this week because there are only three working days, with a number of mills' workers still on leave. I believe trading will pick up next Tuesday when mills update their offers. This week's movements in the domestic market, which appears to have been affected by the contraction in the manufacturing sector, will determine how offers are revised," a Beijing-based trader said.

## SHANGHAI FUTURES EXCHANGE

The most-traded May HRC futures contract closed at 3,294 yuan per tonne on Wednesday, down 51 yuan per tonne from last Friday.

## SHANGHAI

### CHINA REBAR: Domestic prices drop on weakening billet market

China's domestic rebar prices fell on Wednesday January 2 after the billet market weakened over the New Year holiday.

#### DOMESTIC

- Eastern China (Shanghai): 3,700-3,750 yuan (\$538-545) per tonne, down 50-60 yuan per tonne
- Northern China (Beijing): 3,600-3,650 yuan per tonne, down 20-30 yuan per tonne

The price of billet dropped sharply over the past few days due to weak demand, resulting in bearish sentiment in the downstream rebar market.

Both spot and futures prices for the long steel product fell, which dampened buying interest, market sources said.

#### EXPORT

- MB fob China Rebar Index: \$485 per tonne, unchanged
- Most steel mills did not issue new offers during the day. One steelmaker in eastern China set its offer at \$495 per tonne fob, the same as last week.

Market participants expect mills to accept prices of around \$475-495 per tonne fob in view of the domestic prices in different parts of China.

For instance, rebar prices in the major market of Shenyang city, in northeastern China's Liaoning province were heard at 3,450-3,500 yuan per tonne. Market sources expect mills in the region to accept export orders at around \$475 per tonne fob.

Domestic prices in eastern China were at 3,700-3,750 yuan per tonne, which have sources expecting steelmakers in the region to take export orders at \$495 per tonne fob.

No bids were heard amid low demand for Chinese rebar.

Offers from non-Chinese suppliers of the long steel product have been competitively lower.

For example, export prices for rebar in the Commonwealth of Independent States were at \$450-460 per tonne fob Black Sea on Monday, down \$5 per tonne week on week.

## MARKET CHATTER

"Stockists lost money on their inventories in November due to the sharp price decreases, and they are not very bullish about prices in February and March, so they are not planning to stockpile materials. The inactivity will weigh on the rebar market," a trader in Shanghai said.

## BILLET

As at 3pm, billet was being traded at 3,300 yuan per tonne including VAT in Tangshan, down 80 yuan per tonne from last Friday.

## SHANGHAI FUTURES EXCHANGE

The most-traded May rebar futures contract closed at 3,382 yuan per tonne on Wednesday, down 22 yuan per tonne from last Friday.

## JESSICA ZONG

## BURSA

### GULF STEEL BILLET, REBAR: Reduced prices fail to stir demand

Import and domestic prices for rebar and billet in the United Arab Emirates were stable this week, with demand remaining poor, sources told Fastmarkets on Wednesday January 2.

## DOMESTIC REBAR

Local rebar producers had announced on December 20 that there would be reduced prices for material to be shipped in January. These prices came into effect at the time of the announcement.

The country's largest producer, Emirates Steel, was offering rebar at 1,899 dirhams (\$517) per tonne, Conares Steel was offering its rebar at 1,888 dirhams per tonne, and Hamriyah Steel was offering rebar at 1,890 dirhams per tonne. All these prices were on an ex-works basis.

Fastmarkets' weekly price assessment for domestic rebar in the UAE was unchanged at 1,888-1,899 dirhams per tonne ex-works on January 2.

## REBAR IMPORTS

Omani producers were offering rebar to the UAE at \$500-505 per tonne cfr on a theoretical weight basis but no major deals have been heard since a booking last week at \$500-502 per tonne cfr, theoretical weight.

Fastmarkets' weekly price assessment for UAE rebar imports was \$500-505 per tonne cfr on a theoretical weight basis on Wednesday, widening upward from \$500-502 per tonne cfr last week.

## BILLET IMPORTS

Steel billet from the Commonwealth of Independent States (CIS) was on offer to the UAE at \$460-470 per tonne cfr but no new bookings have been heard so far this week.

Fastmarkets' weekly price assessment for UAE steel billet imports was unchanged at \$460-470 per tonne cfr on Wednesday.

# Carbon steel long products

## LONDON

### Long Steel Products Trade Log, January 2, 2019

The latest bids, offers and deals in the global HP markets for rebar, wire rod, steel beams and other long steel products.

#### LATEST TRANSACTIONS:

##### REBAR

- East China, domestic, grade III 16-25mm rebar, traded at 3,700-3,750 yuan (\$538-545) per tonne, including VAT.
- North China, domestic, grade III 16-25mm rebar, traded at 3,600-3,650 yuan per tonne, including VAT.

##### WIRE ROD

- China, chromium-added mesh-quality wire rod, assessed at \$485-490 per tonne fob, January/February shipments.

## SHANGHAI

### China's Shagang cuts long steel prices for early January

Eastern China's Shagang has lowered the prices for its long steel products for shipment in early January.

The mill is selling its HRB400 16-25mm rebar at 3,880 yuan (\$564) per tonne over the January 1-10 period, down 140 yuan per tonne from its last set of prices, it said on Tuesday January 1.

Shagang also cut its HPB300 wire rod prices by 100 yuan per tonne to 3,980 yuan per tonne for the same period.

Both prices are on an ex-works basis, including value-added tax.

Spot rebar prices moved down in late December amid inactive trading, and rebar inventories at mills increased. Participants thought the above two factors were the main reasons for the mill to cut its list prices.

For example, rebar prices in eastern China were at 3,760-3,800 yuan per tonne on December 28, down 30-40 yuan per tonne from December 20.

Rebar inventories at steel mills were at 1.9 million tonnes on December 27, up 70,000 tonnes from a week earlier, according to a local industry information provider.

## METAL BULLETIN'S KEY IRON ORE PRICES

cfr main China port \$ per dry metric tonne

	Price	Change <sup>†</sup>	Assessed
Iron ore index (62% fe)	72.07-72.07	0.95% ▲	02 Jan 19
Iron ore pellet index cfr Qingdao (65% fe)	122.42-122.42	0.77% ▲	28 Dec 18

## SHANGHAI, SINGAPORE

### IRON ORE DAILY: Prices rangebound after New Year break

Physical iron ore prices were largely rangebound on Wednesday January 2 amid mixed signals after the New Year long weekend in China.

#### MB 62% FE IRON ORE INDEX:

\$72.07 per tonne cfr Qingdao, down \$0.66 per tonne.

#### MB 62% FE PILBARA BLEND FINES INDEX:

\$71.90 per tonne cfr Qingdao, down \$0.66 per tonne.

#### MB 62% FE IRON ORE INDEX-LOW ALUMINA:

\$74 per tonne cfr Qingdao, down \$0.12 per tonne.

#### MB 58% FE PREMIUM INDEX:

\$63.90 per tonne cfr Qingdao, down \$0.25 per tonne.

#### MB 65% FE IRON ORE INDEX:

\$86.60 per tonne cfr Qingdao, down \$0.70 per tonne.

#### MB 62% FE CHINA PORT PRICE INDEX:

557 yuan per wet metric tonne (implied 62% Fe China Port Price \$71.88 per dry tonne), up 2 yuan per wmt.

#### KEY DRIVERS

China's ferrous futures generally trended down throughout the first trading day of 2019. The country's spot rebar and hot-rolled coil prices also fell 20-80 yuan (\$2.90-11.60) per tonne compared with last Friday's prices.

Mainstream Australian iron ore fines, however, traded at stable or slightly higher prices at Chinese ports, with relatively healthy stock levels.

In the seaborne market, the availability of January shipments of Pilbara Blend fines was limited, while two January cargoes of Brazilian Blend fines changed hands during the day, according to sources.

For 65% Fe Brazilian fines, port prices remained soft amid ample inventories, but seaborne supplies have reduced, the sources added.

The week-long Chinese New Year break - set for February 4-10 this year - is just a month away and some market participants believe pre-holiday restocking could prop up iron ore prices.

Fastmarkets' daily MB 62% Fe Iron Ore Index fell \$0.66 on Wednesday, while the daily MB 65% Fe Iron Ore Index dropped by \$0.70 per tonne. The price movements were based on the visible market activity detailed below, which was included in the index calculation according to the published methodology.

For the calculation of Fastmarkets' MBI01-65 index judgment was applied to carry over data in today's indices due to low liquidity in the 24-hour pricing window, corresponding with published fall-back measures.

## QUOTE OF THE DAY

"Mills will usually be more aggressive in building stocks leading up to the Lunar New Year holiday, so this could lift prices," a mill source in north China told Fastmarkets.

## TRADES/OFFERS HEARD IN THE MARKET

- Vale, Global Ore, 170,000 tonnes of 62% Fe Brazilian Blend fines, traded at \$74 per tonne cfr China, laycan January 21-30.
- Vale, tender, 170,000 tonnes of 63% Fe Brazilian Blend fines, sold at the arrival-month average of the MB 62% Fe Iron Ore Index-Low Alumina, adjusted for Fe content, plus a premium of \$0.80 per tonne, laycan January 11-20.
- BHP, private tender, joint cargo, 80,000 tonnes of 57% Fe Yandi fines, sold at the January average of two 62% Fe indices, adjusted for Fe content, plus a discount of \$3 per tonne; 90,000 tonnes of 61% Fe Jimblebar fines, sold at the February average of two 62% Fe indices, adjusted for Fe content, plus a discount of \$5.95 per tonne, laycan January 16-25.
- Global Ore, 177,000 tonnes of 62% Fe Standard Sinter Feed Guaiba, offered at the January average of the MB 62% Fe Iron Ore Index and its Fe value-in-use plus a premium of \$1.05 per tonne, bill of

lading dated December 7.

- Beijing Iron Ore Trading Center (Corex), 170,000 tonnes of 61.22% Fe Standard Sinter Feed Guaiba, offered at the January average of the MB 62% Fe Iron Ore Index and its Fe value-in-use plus a premium of \$1.05 per tonne, bill of lading dated December 7.
- Corex, 65,000 tonnes of 65% Fe Karara Standard Magnetite Concentrate, offered at the February average of a 65% Fe index, plus a premium of \$5 per tonne, laycan February 1-10.
- BHP, private tender, 240,000 tonnes of 63% Fe unscreened Newman lump, laycan January 16-25.

## PORT PRICES

Pilbara Blend fines were trading at around 550-560 yuan per wmt in Tangshan city and in Shandong province during the day, compared with 543-556 yuan per wmt last Friday, sources told Fastmarkets.

The latest price range was equivalent to \$70.70-72 per tonne cfr China.

## DALIAN COMMODITY EXCHANGE AFTERNOON CLOSE

The most-traded May iron ore futures contract closed at 489.50 yuan per tonne on Wednesday, down by 5 yuan per tonne from last Friday's closing price.

## SINGAPORE

### COKING COAL DAILY: Seaborne prices drop despite Saraji suspension

Seaborne coking coal prices fell on Wednesday January 2 after market participants returned to news of the suspension of operations at the Saraji coking coal mine in Queensland, Australia.

The mine, operated by the BHP Mitsubishi Alliance (BMA), produced 1.1 million tonnes of coking coal in the July-September period. BMA produced a total of 7.7 million tonnes of the steelmaking raw material during the quarter.

"Operations at the Saraji mine have been suspended until further notice," BHP said on Tuesday. There was no update on when the suspension - made following a fatal accident on New Year's Eve - at Saraji would be lifted at the time of writing.

Meanwhile, trading activity in the seaborne coking coal market remained muted on Wednesday, though some Chinese participants have said that restrictions at the country's ports were easing.

"The buyers' resistance to seaborne cargoes is more a function of the levels at which they are being offered rather than any problems due to restrictions at the Chinese ports," a steel mill source in the country said.

"Domestic supply has been smooth in recent weeks and seaborne prices need to come down further for Chinese end users to see their value over domestic materials," he added.

The source was referring to informal restrictions at Chinese ports implemented in November and December last year to keep China's coal imports from exceeding the preceding year's levels.

China imported around 69 million tonnes of coking coal in 2017. By the middle of last year, its import rate, when annualized, had breached 2017 levels.

Another buyer source in China said that restrictions had eased considerably at the Port of Jingtang in the Tangshan region, but added that they remained at the Port of Bayuquan further northeast.

A cargo of premium hard coking coal was offered on online trading platform Global Coal at \$213 per tonne fob Australia during

the day, sources told Fastmarkets.

On the Dalian Commodity Exchange, the most-traded May coking coal contract closed at 1,145.50 yuan per tonne on Wednesday.

The most-traded May coke contract closed at 1,876.50 yuan per tonne.

Markets in China were closed on the first two days of this week for the New Year.

Fastmarkets' MB cfr China Premium Hard Coking Coal Index was unchanged during the day, at \$202.81 per tonne. The cfr China hard coking coal index was stable, at \$193.30 per tonne.

The fob Australia premium hard coking coal index dropped \$4.16 per tonne to \$215.23 per tonne while the fob Australia hard coking coal index was flat, at \$182.83 per tonne.

The cfr China low-vol pulverized coal injection index dropped \$0.82 per tonne to \$133.66 per tonne while the fob Australia equivalent was unchanged, at \$124.30 per tonne.

#### DEEPALI SHARMA

## SINGAPORE

### BHP stops work at Saraji coking coal mine after accident

BHP has suspended operations at the Saraji coking coal mine in Queensland, Australia following a fatal accident on New Year's Eve.

"The site incident management team has been activated, and the emergency services including police are attending the scene. BHP Mitsubishi Alliance (BMA) is working closely with the relevant authorities on this incident," the miner said on Tuesday January 1.

BHP did not say how long the suspension would last.

Saraji produced 1.1 million tonnes of coking coal in the three months to September last year. BMA's six mines produced a total of 7.7 million tonnes of coking coal during the quarter.

Fastmarkets' MB Premium Hard Coking Coal Index stood at \$219.25 per tonne fob Australia on Monday December 31, unchanged from last Friday.

The index averaged \$223.32 per tonne fob Australia in December, down 7% compared with a year earlier.

The index was not published on New Year's Day on account of a public holiday in Singapore.
